DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Rainville et al (Publication No US 2002/0069411 A1).

In considering claim 1, Rainville et al discloses all the claimed subject matter, note 1) the claimed a display configured to display a primary image and picture-in-picture image (PIP) overlaying the primary image is met by the television display 102(Figs. 1 and 3, page 2, [0021], [0027]), 2) the claimed a processor operatively coupled to the display and configured to receive a first video data stream for the primary image and to receive a second video data stream for the PIP is met by the settop box 101 (Figs. 1 and 6, page 2, [0022]-[0025] and page 3, [0033]-[0039]), and 3) the claimed a user input device operatively coupled to the processor and configured to alter a display characteristic of the PIP with respect to the primary image is met by the remote control 107 (Figs. 1 and 5, page 2, [0029]-[0032]).

In considering claim 2, the claimed wherein the display characteristic of the PIP is a transparency of the PIP and the processor is configured to alter the transparency of

Art Unit: 2614

the PIP with respect to the primary image is met by the video/GFX control engine 208 (Fig. 6, page 3, [0037]).

In considering claim 3, the claimed wherein the processor is configured to render the PIP transparent by combining a weighted average of the first and second video data streams is met by the video/GFX control engine 208 (Fig. 6, page 3, [0037]-[0038]).

In considering claim 4, the claimed wherein the user input device is configured to provide a signal to the processor to adjust the weighted average in response to a user input is met by the remote control 107 (Figs. 1 and 5, page 2, [0029]-[0032]).

In considering claim 5, the claimed wherein the display characteristic of the PIP is a color bias of the PIP and the processor is configured to alter the color bias of the PIP with respect to the primary image is met by the position information and other display attributes such as color, border etc. for each of entity 305 are represented in a logical structure called a box 306 (Fig. 8, the position information and other display attributes such as color, border etc. for each of entity 305 are represented in a logical structure called a box 306 (Fig. 8, page 3, [0040]-[0057])).

In considering claim 6, the claimed wherein the processor is configured to alter the color bias of the PIP by combining a weighted average of the first video data stream and a color bias is met by the output 213 of the display formatter module 212 (Figs. 6 and 8, page 3, [0040]-[0057]).

In considering claim 7, the claimed wherein the user input device is configured to provide a signal to the processor to adjust the color bias of the PIP by adjusting the

Art Unit: 2614

weighted average in response to a user input is met by the remote control 107 (Figs. 1 and 5, page 2, [0029]-[0032]).

In considering claim 8, the claimed wherein the color bias is one of a solid color bias or a color scheme is met by the color of television and graphic image (Fig. 5).

In considering claim 9, the claimed wherein the video display device is a television is met by the television display 102(Figs. 1 and 3, page 2, [0021], [0027]).

Claim 10 is rejected for the same reason as discussed in claims 1 and 2.

Claim 11 is rejected for the same reason as discussed in claim 3.

Claim 12 is rejected for the same reason as discussed in claims 2 and 3.

Claim 13 is rejected for the same reason as discussed in claims 7 and 8.

Claim 14 is rejected for the same reason as discussed in claim 7.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Westerink et al (US Patent No. 6,359,657 B1) disclose simultaneously displaying a graphic image and video image.

Yamada (US patent No. 6,330,002 B1) discloses image color blending processor.
